Roof Panels

This standing seam metal panel snaps together, no seaming required, reducing installation labor and costs. Snap Lock is a performance-rated, non-structural system that offers an attractive architectural look for roofing projects.

It has an easy to install 1-1/2" high snap-lock joint so no field seaming is required. Not only is it weather tight but also ideal for architectural and light commercial applications.

Choose from our premium coatings, such as SMP40® and Kynar® 500, to ensure your project not only meets but exceeds expectations

Wall Panels

The simplicity of the Soffit & Wall panel is its best design feature. Uniform dimensions and a clean appearance allow the designer to plan modules, eliminate complicated pieces and follow wall curvatures.

The Soffit & Wall panel can be vertical, horizontal, perpendicular or skewed to the building line, allowing the designer to create with multidimensional freedom. Soffit & Wall panels use the positive fastened method and are attached directly to the substructure. The fastener is concealed behind the flush face. Soffit & Wall panels are used for soffits and interior liners.

Choose from our premium coatings, such as SMP40® and Kynar® 500, to ensure your project not only meets but exceeds expectations

Product Specifications

- ✓ **Applications:** Soffit and Wall
- ✓ **Coverage Width:** from 8" to 24"

Wall Panels

Flat Flex Panel is the recommended product for the designer who wants a barrel vault with a smooth look and horizontal lines instead of vertical. It's ideal for curved applications or soffits. Because the panels are generally run parallel to the curved surface, no pre-curving of the Flat Flex panel is required.

Flat Flex panel is available in a 8 inch width and clips down to a waterproofed solid substrate.

Choose from our premium coatings, such as SMP40® and Kynar® 500, to ensure your project not only meets but exceeds expectations

The Super Flat Soffit canopy is an all-extruded, pre-engineered canopy designed for high-load architectural applications. The Flat Soffit deck style provides a ceiling aesthetic and achieves a clean, sleek design for any canopy application. The smooth deck can be combined with different fascia profiles to complement any design emphasis or building requirement. Compared to the alternatives, Atlantic Metal aluminum, non-rusting finish and high-quality extruded materials provide superior longevity, while meeting all local code requirements for snow and wind loads.

Choose from our premium coatings, such as SMP40® and Kynar® 500, to ensure your project not only meets but exceeds expectations
